

Using Chromacryl® Binder Medium

Product Description:

The most versatile Chromacryl medium. An ideal primer for all painting surfaces eg: paper, cardboard, canvas, hardboard etc. to produce a good "tooth". Excellent as a sealer on wood, metal, leather etc. Great as a collage adhesive or with acrylic paints to achieve bright luminous glazes. Use as a matte varnish or to 'shock proof' plaster. Adds gloss and extends acrylic paints.

1. Use straight from the container to seal paper.

2. Mix 1 part medium to 1 part water to make a collage adhesive.

3. Cut out the prepared items for collage. Eg: pre-painted motifs or magazine pictures.

4. Apply Binder Medium to desired areas.

5. Place collage motifs onto surface and brush more medium over the top to seal.

6. The finished artwork - with good collage adhesion.
